

Biotinylated Goat Anti-Nitrotyrosine, Polyclonal Antibody.

Product Specification

| | |
|--------------------------|--|
| Catalog No: | NY20B-G1a, 0.5 ml |
| Host Species: | Goat |
| Size and Physical State: | 0.5 ml in Freeze-dried powder |
| Antibody Conc.: | 1 mg / ml |
| Source: | Polyclonal goat anti-nitrotyrosine purified by nitrated protein-Sepharose™ affinity column and labeled with Biotin. |
| Preservative: | 75 mM PBS, 75 mM NaCl, 0.5 mM EDTA, 0.02% NaN ₃ , pH 7.2. |
| Stabilizer: | 10 mg / ml Bovine Serum Albumin. |
| Specificity: | Specifically binds to nitro-LDL, and other nitrated proteins. Dilution for immunoblot and ELISA range: 200 to 40,000. |
| Use: | The antibody can be used for detection of nitrotyrosine modified proteins in plasma and other nitrated proteins, immunoassays and immunoblots. |

Reconstitution and Storage: Freeze-dried product should be stored refrigerated until opened. After opening, restore to 0.5 ml with distilled water. If it is not completely clear after standing for 1-2 Hours at room temperature, centrifuge the product. It is stable for several weeks at 4°C as an undiluted liquid. Do not use for more than one day after dilution. For extended storage after reconstitution, we suggest aliquot to avoid repeated freezing and thawing; or the addition of an equal volume of glycerol to make a final glycerol concentration of 50%, followed by storage at -20°C. The concentration of protein and buffer salts will decrease to one-half of the original after the addition of glycerol.
